

Renishaw and the Bristol Post have teamed up to offer one local school the chance to win £10,000. The winning primary or secondary school can use this significant funding towards anything in the name of science education! This could be new science lab equipment, science field trips or anything that helps get youngsters into science.

We are one of the lucky schools who have successfully registered and we could be the lucky winners with your help!

To win we need to collect tokens printed in the Bristol Post. We would like to ask for your support by collecting as many tokens as possible. Tokens will appear in the Bristol Post from Friday, November 3 to Monday, December 4.

Please bring any tokens you have collected to the school reception as soon as possible and by Tuesday, December 5 so that we can submit them to the Bristol Post in time!

Thank you for your support
